

Omni E Series filters are available as:

- 12" and 15" sizes.
- Micron sizes 1M, 5M, 10M
- From 3000 gallons to 20,000 gallons
- Chlorine, VOC's, taste, sediment, lead, color, and odor reduction with scale/corrosion inhibitor

Omni E Series are made to fit the Everpure Q series filter heads

Tested to the following standards:

- ANSI (American National Standards Institute)
- NSF (National Sanitation Foundation)

Chlorine reduction capacity based on laboratory testing conducted using test protocol contained in NSF Standard 42. This filtration block is tested and Certified by NSF International under ANSI/NSF Standard 42 for materials only.

Don't let the name fool you, the ELF-Series of filters from Omnipure was designed specifically for the higher volume requirements of the food service industry.

The ELF (Extra-Large Format) filters have a capacity of up to 20,000 gallons and flow rates of up to 2.0 gal/minute. Engineered as a two piece system, ELF heads are available with or without an auto shut off valve. Replacing the filter body is as easy as a twist of the wrist, no tools needed. The new extended cap version makes ELF's.
