

BELLAQUA

The Cooler Choice

1M CARBON BLOCK UNDER COUNTER FILTER SYSTEM

This system can utilize many 10" X 2.5" filter cartridges. The filter recommended is the Matrix PB1. The PB1 has Lead, Chlorine, Cyst and PFAS Removal/reduction. Faucet upgrades available.

Under Counter Filtration systems are available as a single space saving housing and can have as many as 3 housings.

Cartridges can be integrated from 1 micron pre-filter for sediment, up to .5 micron that can capture cysts (cryptosporidium, Giardia) and reduce chemicals and lead.

A separate faucet is installed in the counter. Faucets are available in many styles
